E(merging) Books
by: **Sam Vaknin, Ph.D.**

A novel re-definition through experimentation of the classical format of the book is emerging.

Consider the now defunct BookTailor. It used to sell its book customization software mainly to travel agents - but this technology is likely to conquer other niches (such as the legal and medical professions). It allows users to select bits and pieces from a library of e-books, combine them into a totally new tome and print and bind the latter on demand. The client can also choose to buy the end-product as an e-book. Consider what this simple business model does to entrenched and age old notions such as "original" and "copies", copyright, and book identifiers. What is the "original" in this case? Is it the final, user-customized book - or its sources? And if no customized book is identical to any other - what happens to the intuitive notion of "copies"? Should BookTailor-generated books considered to be unique exemplars of one-copy print runs? If so, should each one receive a unique identifier (for instance, a unique ISBN)? Does the user possess any rights in the final product, composed and selected by him? What about the copyrights of the original authors?

Or take BookCrossing.com. On the face of it, it presents no profound challenge to established publishing practices and to the modern concept of intellectual property. Members register their books, obtain a BCID (BookCrossing ID Number) and then give the book to someone, or simply leave it lying around for a total stranger to find. Henceforth, fate determines the chain of events. Eventual successive owners of the volume are supposed to report to BookCrossing (by e-mail) about the book's and their whereabouts, thereby generating moving plots and mapping the territory of literacy and bibliomania. This innocuous model subversively undermines the concept - legal and moral - of ownership. It also expropriates the book from the realm of passive, inert objects and transforms it into a catalyst of human interactions across time and space. In other words, it returns the book to its origins: a time capsule, a time machine and the embodiment of a historical narrative.

E-books, hitherto, have largely been nothing but an ephemeral rendition of their print predecessors. But e-books are another medium altogether. They can and will provide a different reading experience. Consider "hyperlinks within the e-book and without it - to web content, reference works, etc., embedded instant shopping and ordering links, divergent, user-interactive, decision driven plotlines, interaction with other e-books (using Bluetooth or another wireless standard), collaborative authoring, gaming and

community activities, automatically or periodically updated content, ,multimedia capabilities, database, Favourites and History Maintenance (records of reading habits, shopping habits, interaction with other readers, plot related decisions and much more), automatic and embedded audio conversion and translation capabilities, full wireless piconetworking and scatternetworking capabilities and more".

Sam Vaknin is the author of "Malignant Self Love - Narcissism Revisited" and "After the Rain - How the West Lost the East". He is a columnist in "Central Europe Review", United Press International (UPI) and ebookweb.org and the editor of mental health and Central East Europe categories in The Open Directory, Suite101 and searcheurope.com. Until recently, he served as the Economic Advisor to the Government of Macedonia.

"But I haven't the time not to shop at Amazon for books"

"But I haven't the time not to shop at Amazon for books" by Dilip Sinha

It is correctly often thought that people's time is valuable and that they do NOT have the time to go shopping in the big book stores - the gas costs, getting stuck in the queues at the checkout...I know what you mean.

But there are other people - like us - online as well as Amazon. If you are looking for one of the top books, people like us display them and allow you to pay by credit card as well. So you save nothing by going to Amazon for bestsellers unless they give you over around 35-40% off paperbacks and coming up to 30% on other books.

Where I agree Amazon does score is that it displays lots of books for you to search through. Others don't either because they are not big enough companies yet or because few people enquire about most books - how often are you interested in seeing all the books Amazon has about kite flying?

They are time saving yes, but because they allow people who are interested in things like kite flying to see books at the expense of people like you who want bestsellers - you pay \$1.60 to subsidise kite flyers! So for bestsellers, there is really no need to go to Amazon.... and if you don't care about your \$1.60 and you don't need the book urgently, it won't bother you to wait a couple of weeks equally to wait while other people get you the books at a cheaper price...

A UK online bookseller selling books at prices often cheaper than Amazon.co.uk
